+ ABOUT ME

Aspiring full-stack web developer with 6+ months of hands-on experience in building responsive and interactive web applications. I'm passionate about writing codes and turning that into something new or amazing. Currently working with React, Tailwind, Firebase, Express and MongoDB. I wish to learn TypeScript, NextJs, Prisma, Docker, SQL, PostgreSQL, Redux, AWS, Vitest, and other trending, powerful and modern technologies. This is why I will enroll in a new bootcamp (Level 2) of Programming Hero. I also wish to deep dive into more programming, I have planned to learn C, C++ and Python next year. Maybe I will start competitive programming or else I will build a strong foundation on Data structure and algorithm and will use that into my development field. I aim to become a highly skilled developer and earn through remote jobs and freelance platforms like Upwork and Fiverr.

+ EDUCATION

- Bangladesh Open University 2023
HSC (HUMANITIES)
- Satkhira Govt High School 2017
Satkhira
